folder_poetry_club.txt
folder poetry club
coding isn't something that
just happens behind your
screen. coding can be a
holistic computer practice, a
new relationship you have with
your computer & your computers
habits - from the way you name
your files or organize your
folders, to completely changing
how you perform routine tasks
on your computer, such as
moving a file.

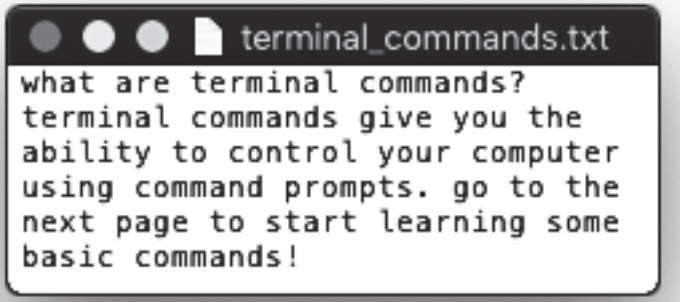
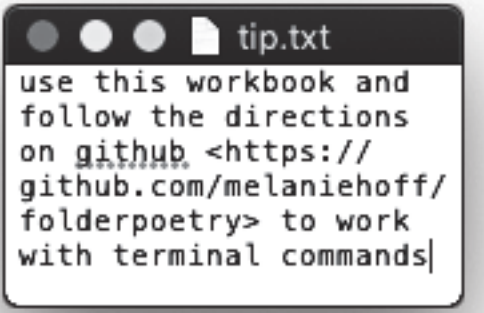
terminal.txt
what is terminal?
a way to get text based access to your operating system
how to get to it?
1. type command + spacebar to open search
2. type 'terminal'
bash.txt
what is bash?
bash is the programming language that we use in the terminal, often one line at a time, but we can also put bash code in a file and run that file



terminal_commands.txt
what are terminal commands?
terminal commands give you the
ability to control your computer
using command prompts. go to the
next page to start learning some
basic commands!



tip.txt
use this workbook and
follow the directions
on github <https://
github.com/melaniehoff/
folderpoetry> to work
with terminal commands
